Richard's details have been added to this transcript, along with his family and servants.

How many of Richard's grown up children were staying with him in 1861?

Richard and his wife Rachel had thirteen children. Why do you think Rachel is not recorded in this census?

Why were only four of his children living with Richard?

Who was the only one of his children with a paid job?

Why do you think the nine year old girl was living with him? If you can, use a map to find the town where she was born.

Why were there so many servants?

What would be the difference in the maids' jobs?

 How many different places did the servants come from?
